

## PRODUCT FACT SHEET

### 16MM COLOR LED SIGN WITH XVS STANDARD

The world of LED signs clearly has a new leader

How sweet it is. The Watchfire 16mm color LED offers our sharpest, brightest, most lifelike resolution ever with 33% more pixels. Amazing animations. Incredible color depth. The messages and images are ideal for up-close viewing and practically tap people on the shoulder to get their attention. This is exactly the kind of advertising decision that could really sweeten your bottom line.

**“Sales have increased. ... For so many years, people would just drive by and not even notice we were here. Now - we are noticed again.”**

– Ralph Semb, French King Entertainment Center, Irving, Massachusetts

### CONSTRUCTION & ENGINEERING

- Watchfire LED modules are unique in featuring an all-weather full encapsulation in a bed of silicone gel
- Rigorously tested through 180 consecutive days of underwater immersion, 60 consecutive days of salt spray, and temperatures down to -40° F
- Modular design can be scaled to very large sizes
- Long-life 100,000-hour LEDs are up to 90% more efficient than incandescent lamps
- Time, day and date displays (temperature display optional)
- 100% solid state with modular design for ease of service
- All manufacturing is controlled in Watchfire's vertically integrated manufacturing plant in the Midwest, from LED circuit board assembly to aluminum cabinetry. A computerized state-of-the-art facility assures reliable on-time delivery.
- Windowless design (no glare!) that's 40% brighter and easier to maintain than other makes with plastic windows
- Extruded aluminum cabinetry featuring precision mitered corners, solid welds and 30% gloss black polyurethane finishes
- Watchfire signs exclusively feature stainless fasteners
- Electrical: required service equals 100% of total wattage; average energy consumption equals about 1/3 of total wattage
- Available in both Super-Vivid and Energy-Conscious models

**“Beginning immediately, our sales took a fairly substantial jump and have stayed around +6% to +11% per week ever since.”**

– Steve Diveley, Diveley Development Corp

### WARRANTY

The industry-standard Watchfire Limited Warranty covers all sign parts and factory labor on your Watchfire LED sign for a full five years.

### IGNITE® GRAPHICS SOFTWARE Exclusively from Watchfire

Ignite is exclusively for Watchfire LED signs. An easy-to-use interface puts the ability to create stunning graphic and video displays within the reach of anyone and dramatically eliminates the headaches associated with sign message software. Instantly preview and schedule messages from your computer so you know what's playing on your sign at all times; no more disappointment when you see your sign.

Within minutes, you are up and running, creating exciting text, graphics, animation and video. As a Watchfire sign owner, you'll have a full range of standard graphics and fonts. You'll also have downloadable graphics, video and art collections from Watchfire available for purchase when you want to customize your sign messages even further. For full custom content services offered through Watchfire's art department, contact your sign company or Watchfire Territory Rep.

#### QUICK POINTS

- Edit, schedule and update from just one program
- Use Ignite's step-by-step wizards to effortlessly create and manage content
- Preview your graphics before you run them on your sign
- Import AVI files of custom content created in other software
- Extensive EasyArt library with special collections
- Intuitive, easy-to-use interface
- Training manual included
- Software training available via telephone
- Connect to your sign through several communication options

**“Our floor traffic has been unbelievable (people everywhere).”**

– Michael Harris, General Manager of Harris TV & Appliance

### THE XVS ADVANTAGE

#### Supercharged LED and Video Display

The XVS feature provides tremendous color depth—true National Television Systems Committee (NTSC) colors—and wider viewing angles. The frame rate is increased to full-motion 30 frames per second, at true “live” speed. With all this, your sign can have more accurate and deeper color hues, a wider, brighter viewing area, and even run optional live video feed.

- True NTSC color depth
- Faster frame rate
- Wider viewing angles
- Live camera feed option
